

## § 820.11

### § 820.11 Performance standards: Anthracite mines in Pennsylvania.

Anthracite mines in Pennsylvania, as specified in section 529 of the Act, shall comply with its approved State program, including Commonwealth of Pennsylvania statutes and regulations, and revisions thereto that are approved by OSM pursuant to part 732 of this chapter.

[47 FR 44943, Oct. 12, 1982]

## PART 822—SPECIAL PERMANENT PROGRAM PERFORMANCE STANDARDS—OPERATIONS IN ALLUVIAL VALLEY FLOORS

Sec.

822.1 Scope.

822.10 Information collection.

822.11 Essential hydrologic functions.

822.12 Protection of agricultural activities.

822.13 Monitoring.

AUTHORITY: Pub. L. 95-87, 30 U.S.C. 1201 *et seq.*

SOURCE: 48 FR 29822, June 28, 1983, unless otherwise noted.

### § 822.1 Scope.

This part sets forth additional requirements for surface coal mining and reclamation operations on or which affect alluvial valley floors in the arid and semiarid regions of the country.

### § 822.10 Information collection.

The information collection requirements contained in § 822.13 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1029-0049. The information is being collected to meet the requirements of sections 510(b)(5) and 515(b)(10)(F) of the Act which provide the information collection requirements and performance standards for alluvial valley floors. This information will be used to enable the regulatory authority to assess the impact of the proposed operation during the permanent regulatory program. The obligation to respond is mandatory.

### § 822.11 Essential hydrologic functions.

(a) The operator of a surface coal mining and reclamation operation shall minimize disturbances to the hydrologic balance by preserving

## 30 CFR Ch. VII (7-1-15 Edition)

throughout the mining and reclamation process the essential hydrologic functions of an alluvial valley floor not within the permit area.

(b) The operator of a surface coal mining and reclamation operation shall minimize disturbances to the hydrologic balance within the permit area by reestablishing throughout the mining and reclamation process the essential hydrologic functions of alluvial valley floors.

### § 822.12 Protection of agricultural activities.

(a) *Prohibitions.* Surface coal mining and reclamation operations shall not: (1) Interrupt, discontinue, or preclude farming on alluvial valley floors; or (2) cause material damage to the quantity or quality of water in surface or underground water systems that supply alluvial valley floors.

(b) *Statutory exclusions.* The prohibitions of paragraph (a) of this section shall not apply—

(1) Where the premining land use of an alluvial valley floor is undeveloped rangeland which is not significant to farming;

(2) Where farming on the alluvial valley floor that would be affected by the surface coal mining operation is of such small acreage as to be of negligible impact on the farm's agricultural production;

(3) To any surface coal mining and reclamation operation that, in the year preceding August 3, 1977—

(i) Produced coal in commercial quantities and was located within or adjacent to an alluvial valley floor; or

(ii) Obtained specific permit approval by the State regulatory authority to conduct surface coal mining and reclamation operations within an alluvial valley floor; or

(4) To any land that is the subject of an application for renewal or revision of a permit issued pursuant to the Act which is an extension of the original permit, insofar as: (i) The land was previously identified in a reclamation plan submitted under either part 780 or 784 of this chapter, and (ii) the original permit area was excluded from the protection of paragraph (a) of this section
